

Life Expectancy vs Fertility Plot's(1960 & 2013)

Plot Insights

THE EUROPEAN AND AMERICAN COUNTRIES TEND TO BE AT THE TOP LEFT ON BOTH GRAPHS WHERE FERTILITY RATE IS LOWER AND LIFE EXPECTANCY IS HIGHER.

IN 2013, LIFE EXPECTANCY HAS INCREASED TO 70 TO 80 YEARS OF AGE, AND FERTILITY RATE REDUCED TO LESS THAN 2.

IN 1960, THE AFRICAN NATIONS HAVE A FERTILITY RATE OF BETWEEN 5 TO 8 AND LIFE EXPECTANCY LOWER THAN 55 YEARS OF AGE.

IN 2013, THE SAME AFRICAN NATIONS HAVE A SLIGHTLY LOWERED FERTILITY RATE OF BETWEEN 3 TO 7 AND LIFE EXPECTANCY HAS RISEN TO 50 TO 70.

OVERALL, THERE SEEMS TO A TREND WHERE WHEN LIFE EXPECTANCY INCREASES, FERTILITY RATE REDUCES.
